The yellow fever is spreading at Vera Cruz, forty-six deaths having occurred in two weeks.

JOHN G. THOMPSON, the Ohio boss, has been appointed a special agent of the general land office, to investigate land entries. The old French adage, "not a thief to catch a thief," seems to be the rule adopted by this reform administration.

It was once the rule for the west to copy its fashions from the east, but things are reversed now—the east is patterning after us. They are this year having tornadoes and cyclones on the Atlantic border that would do no discredit even to "the rowdy west."

SEVENTY-SEVEN THOUSAND people viewed the remains of Gen. Grant while they lay in state at Albany. The funeral train left that city yesterday afternoon for New York, and at every station on the way great throngs of people gathered to see it pass by. New York city was reached at 5 o'clock, and the remains were at once conveyed to the City Hall, where they will lie in state until Saturday.

THE REVIEW this morning foli-
tates itself upon the report which comes from Washington to the effect that a candidate for postmaster will not be considered ineligible merely because he "edits a Democratic newspaper." The editor of the paper mentioned is now in Washington, and, it seems, has secured such a concession from the department as will enable him to return home feeling that he is not altogether ruled out—although the bird he went after is still "in the bush."

D. M. KENNEDY, the general passenger agent for the New York Central railroad, who has charge of the Grant funeral train, is well known to many Decatur people. Years ago he was at the head of the passenger department of the Illinois Midland, with headquarters at Terre Haute, and during that time was frequently in Decatur. He and his wife often visited here, attending balls and parties, and mingling with our society people, among whom they were great favorites.

LORD CHIEF JUSTICE COLERIDGE, of England, who visited this country a year or two ago, is said to have "made a muck," so to speak, on some American woman while here, and, despite his three score years and ten, he is to be made a party to a branch of promise nisi, unless he marches up to the altar and speaks the magic words which will give to the ambitious American the right to box his ears and repair his garments for the loss of his virginity.

Gov. CAMPBELL and Lieut. Gov. SMITH both having gone to New York, the duties of governor during their absence will devolve upon the president pro tem. of the senate, Hon. W. J. CAMPBELL. It is to be hoped that acting Gov. Campbell may not leave the state during the interim, inasmuch as his absence would result in placing the office of governor in the hands of El Mahdi Haines, and a single day of Haines would be worse than a dozen years of any other demagogue that might be named.

The Chicago News administrators this well merited rebuke to the insane greed for money getting in this country which dares to manifest itself in the presence of death: It is a burning shame that any set of persons should use the occasion of Gen. Grant's funeral as a time for making money by renting windows, peddling and hawking all sorts of things along the line of march, and generally turning the sad occasion to commercial account. It is not likely that the people of New York are different from other people; probably some of the people of any other city would so far forget the proprieties of the occasion as to use it for money making, but that does not make it the less a contemptible. Persons who have not a due sense of the loss suffered by the nation in the death of Gen. Grant should have some regard for the finer feelings of those who have. Or if they have not this, then they should have patriotism enough to care for the good name of our nation. How must it sound when told throughout the nations which have expressed sympathy with our mourning people that on the day of our greatest patriot's funeral the merchants and residents along the way to the tomb turned from their weeping to take up signs to the effect that \$10 will pay for a place at a window while the procession is passing? How can we hope to escape universal condemnation for such contemptible business as this?

NEW YORK, August 6.—From almost daylight yesterday the city began to fill up with strangers who had come to witness the funeral procession. As the morning hours passed they were noticeable on all the leading thoroughfares of the metropolis. The special train from the suburban districts were crowded with old men and young men, women and children, and numerous family parties from all classes of society, and all dressed in their best, were moving quietly along the streets, filling many of the corners and stopping and gazing with great interest at the elaborate draperies of mourning which adorned the train.

Many spent the early part of the day in the downtown and were seen in the church yards of old Trinity and St. Paul's reverently looking at the graves of their ancestors. Early in the morning the funeral train, with the Grand Central Depot as the object point, and advantageous positions along the line of the funeral march were early occupied and persistently held.

By three o'clock the streets in the vicinity of the depot began to be filled, and people who had secured windows all along the route of the procession began to arrive at their places to make sure of their positions. Early in the day the heavy and classic draperies on the buildings along the route had been completely rearranged so that all the effects of the storm had been completely obliterated. In many instances the decorations were largely added to, rendering the effect more sombre and impressive than before.

From the depot to the City Hall the funeral train was a perfect reproduction of the funeral train which had been in the past. The train was a perfect reproduction of the funeral train which had been in the past. The train was a perfect reproduction of the funeral train which had been in the past.

NEW YORK, August 6.—The run from Albany was made without special incident. At Hudson several gangs of workmen from the factories were massed near the station with breasts bare, their brawny arms sleeveless, forming rude but impressive groups. The train glided swiftly on, and approached Catskill, where a large number of people were gathered to witness the funeral train.

Just now there is more or less discussion throughout Illinois with reference to the feasibility of boring for and establishing gas wells, and the more enthusiastic ones assert that there is as good quality of gas in this region as was ever found in Pennsylvania. The accidental discovery of a gas well recently at Clinton, has revived the chat on this subject. The people in that section are wild about the gas well, and no doubt every farmer in that neighborhood who can devote the time to the enterprise, and can put up the money to foot the bills, will search for a gas well on his land. Gas wells have been found in the vicinity of Decatur. Ten years ago Nick Weber was astonished one night when he was boring for water at his old brewery, south of the city, to find that he had struck gas on a small scale. The fluid shot out, and when lighted it burned for many days before the supply was exhausted. More recently Billy Wilson, who now lives at Caeser Station, found a gas well on his farm, two and a half miles east of Mt. Zion. He put the gas to practical use at once, establishing gas works at his place. He piped his dwelling, and used it for cooking and illuminating purposes. He continued to use it for a year before the gas well went back on him. There is no doubt but that gas wells opened in Illinois would prove profitable. Mr. Bishop, who was here on a visit recently from Bradford, Pa., stated that he had no doubt but there was a good quality of gas hereabouts, and predicted that the time would come when the enterprise of boring for it would become general and profitable.

RAPID HOSE COUPLING.
George R. Brett Gives an Exhibition of His Peculiar Talent.

Boston Herald, July 30.
Mr. George R. Brett, of Decatur, Ill., possesses the title of "champion hose coupler of the world." Since Monday last he has been stopping at the Waverly House, Moore Boach. Yesterday afternoon Mr. Brett gave a private exhibition of his skill in breaking couplings and putting on pipes, for the collection of a small party of journalists, veteran firemen and athletes. His feats in this line proved a decided novelty to nearly all present, yet the most wonderful part of the performance was the startling rapidity with which he accomplished his various tricks. He used two sections of ordinary hose, which are joined together by couplings manufactured by the American Hose Company of Chelsea. It is the regulation coupling used by most fire departments. Mr. Brett's feat was the breaking of couplings and putting on pipe under the Iowa state rules, which require the coupler to stand three feet from the coupling, with hands above the head, make 1/2 turns on coupling and then attach pipe. He accomplished this in 1 1/2 seconds, 2 seconds and 1 1/2 seconds. Mr. Brett most adjusted the couplings to three full turns by withdrawing the washers. The first trial was made in 2 1/2 seconds and the next two in 2 1/2 seconds each. One of the party was then invited to simply break the coupling in order to afford a contrast in the matter of speed. It took him fully two seconds to unhook the coupling.
Mr. Brett, who was born in Decatur in 1851, is a visiting the East for the purpose of participating in the forthcoming firemen's tournament in New England, and professes his willingness to compete singly against any team of two hose couplers in New England. Brett will exhibit at the Waverly House for some days. From there he goes to Syracuse, N. Y., to take part in the tournament opening there Aug. 11. The spectators evinced no end of wonderment at the rapid work of the Decatur coupler. At the conclusion of the exhibition Proprietor Moore of the Waverly entertained the party, and his hospitable assistance was held in the parlors, Miss Nathan contributing several bottles and a number of piano solos.

Blue-Mound News.
Mr. John Thaxton, of Mescalito township, brought news to this place this morning of the burning of Mt. Auburn last night. He says that all of the business portion of the town (except the post office building) was burned down. The fire originated in Dial Davis's drug store at about 12 o'clock, and it is supposed to have been the work of an incendiary. Dick Kimball, Dial Davis and Dr. Hixson are the principal sufferers, and their losses are heavy.
The high likelihood of change of postmaster at this place it is now supposed will occur in the near future. Mr. Geo. Drysdale, one of the applicants for the position, is reported to have been canvassing the neighborhood for nomination this week. He has not yet received the appointment, but fully expects it in a few days. It is not known on what grounds or for what particular reason the change is expected, but a report is going that charges of office partisanship against the present incumbent have been forwarded to Washington, and probably explain the matter.
The rain here this morning was a great disappointment to many of our people who had made arrangements to attend the old Stoneington annual picnic to-day.
